SUMMARY

AI Engineer specializing in Python and GenAI, focused on building AI-powered applications, LLM-based systems, and intelligent backend solutions. Experienced with LangChain, LangGraph, FastAPI, REST APIs, databases, and Docker, with a strong foundation in backend development and modern AI workflows. Continuously expanding expertise in AI agents, LLM integration, and scalable AI systems.

SKILLS

Languages: Python, JavaScript.

Frameworks: FastAPI, RESTful APIs, Pydantic, LangChain, LangGraph

Databases & Cloud: MySQL, AWS EC2, S3, Railway, SQLAlchemy.

Tools & Technologies: Git, GitHub, Docker, AI Agents, MCP, n8n, SDLC.

Testing & Automation: Playwright, STLC, Regression Testing, Functional Testing, Postman

EDUCATION

Computer Engineering(AI&ML) | Vaagdevi college of engineering, Warangal 74.6% | 2026

XII | Sri chaitanya junior college, Hanamkonda 75% | 2022

X | Indian public high school, Hanamkonda 10/10 | 2020

INTERNSHIP EXPERIENCE

AI Azure Virtual Internship - Microsoft || Insurance Premium Prediction || May - June 2025

- Integrated Random Forest and XGBoost models into a FastAPI backend, exposing secure REST APIs for real-time Insurance Premium Prediction.
- Validated model performance using standard Machine Learning metrics while implementing Pydantic validation, exception handling, and optimized prediction workflows.
- Improved prediction reliability and API efficiency through optimized Random Forest and XGBoost inference in FastAPI.

EY - NextGen Internship || Spendly – Personal Expense Tracker || Feb - March 2025

- Acquired hands-on expertise in developing scalable Flask applications with REST API integration, CRUD operations, authentication, and relational database management.
- Enhanced problem-solving and backend engineering skills by working with session handling, and clean application architecture.
- Developed database-driven Flask applications using SQLite and SQLAlchemy, implementing CRUD operations, data validation, session management, and efficient database interactions.

PERSONAL PROJECT

Online Voting System | FastAPI, Python, MySQL, JWT, Jinja2

- Developed a secure online voting platform with JWT Authentication, Role-Based Access Control (RBAC), and CSRF Protection, supporting 2 user roles (Admin & Student) and secure session management.
- Engineered 10+ backend modules for Election Management, Candidate Vote Verification, Result Publication, and Profile Management, enforcing one-vote-per-user with automated election lifecycle.
- Designed a normalized MySQL database with 6+ relational tables and implemented secure file uploads, audit verification, and an Admin Dashboard to ensure data integrity, secure transactions, and efficient election administration.

ADDITIONAL INFORMATION

Languages : English, Hindi, Telugu.

Soft skills : Team collaboration, Problem Solving, Adaptability, Communication.
