SUMMARY

Backend Developer specializing in Python and FastAPI, focused on building scalable REST APIs, database-driven applications, and AI-powered backend systems. Experienced with Docker, MySQL, cloud deployment, and modern development workflows while continuously expanding expertise in system design and AI agent development.

SKILLS

Languages: Python, JavaScript.

Frameworks: Fast API, Django, REST APIs, Pydantic, SQLAlchemy.

Databases & Cloud: MySQL, AWS EC2, S3, Railway.

Tools & Technologies: Git, GitHub, Docker, AI Agents, MCP, n8n, SDLC.

EDUCATION

Computer Engineering(AI&ML) | Vaagdevi college of engineering, Warangal

75.6% | 2026

XII | Sri chaitanya junior college, Hanamkonda

74% | 2022

X | Indian public high school, Hanamkonda

10/10 | 2020

INTERNSHIP EXPERIENCE

AI Azure Virtual Internship - Microsoft || Insurance Premium Prediction ||

- Integrated Random Forest and XGBoost models into a FastAPI backend, exposing secure REST APIs for real-time Insurance Premium Prediction.
- Validated model performance using standard Machine Learning metrics while implementing Pydantic validation, exception handling, and optimized prediction workflows.

EY - NextGen Internship || Spendly – Personal Expense Tracker ||

- Acquired hands-on expertise in developing scalable Flask applications with REST API integration, CRUD operations, authentication, and relational database management.
- Enhanced problem-solving and backend engineering skills by working with session handling, and clean application architecture.

ACADEMIC MAJOR PROJECT

Blockchain Privacy Platform | Django, Python, SQLite, Cryptography

- Integrated 5 advanced cryptographic algorithms (ZKP, Ring Signatures, SMPC, TEE, Cryptocurrency Mixers) to analyze blockchain privacy, anonymity, and security.
- Orchestrated 7 Django applications to execute automated blockchain privacy experiments, manage datasets, techniques, and generate research reports on a secure Python-SQLite backend.

PERSONAL PROJECT

Online Voting System | FastAPI, Python, MySQL, JWT, Jinja2

- Developed a secure online voting platform with JWT Authentication, Role-Based Access Control (RBAC), and CSRF Protection, supporting 2 user roles (Admin & Student) and secure session management.
- Engineered 10+ backend modules for Election Management, Candidate Vote Verification, Result Publication, and Profile Management, enforcing one-vote-per-user with automated election lifecycle.
- Designed a normalized MySQL database with 6+ relational tables and implemented secure file uploads, audit verification, and an Admin Dashboard to ensure data integrity, secure transactions, and efficient election administration.

ADDITIONAL INFORMATION

Languages : English, Hindi, Telugu.

Soft skills : Team collaboration, Problem Solving, Adaptability, Communication.

Hobbies : Puzzles, Brain teaser games, Photography and Listening to Music.
